MENU

I was looking for a game similar to the old minesweeper for windows that I can play in a window while I'm working to sharpen up my brain. I thought this would be a good option.

I was wrong. This game seems to be made by a complete amatuer. The games are boring and look like they were designed for a touchscreen or phone. The menus are confusing and ugly. I never thought the look of the graphics would matter (I was looking for minesweeper after all) but this game is just a complete eye sore.
